Please feel free to contact us if you have any questions about our products. Since I am a blacksmith my typing is slow and cumbersome. So for quotes and simple questions that don't require a lot of typing, Email is best. For "how to" questions the Phone is best. For custom CNC Plasma Cutting send your project in either a dxf format or a clean line drawing on white paper no bigger than 8.5x11" with the size, quantity and metal thickness of the parts you wish to have cut out.

□ **-Thank You, Jim**
